## Computer Labs

We have a fully equipped computer lab with internet access and Wi-Fi is also accessible throughout the campus.

## Warehouse Facility

The warehouse facility for all trade features modern storage solutions, including pallet racking and shelving, and has dedicated loading and unloading zones. It prioritizes safety and security with strict protocols and surveillance. Essential amenities like restrooms and break rooms are also available, all while maintaining a focus on health and safety compliance.

## Computer lab for IT courses

The computer lab for the telecommunication and cybersecurity course features advanced technology, high-performance computers, and specialized software for simulations and network management. It includes routers and switches for hands-on troubleshooting and configuration, supported by reliable internet access and technical support. This setup provides an ideal environment for mastering telecommunication systems and cybersecurity skills.
